Who I am
自己紹介

Professional Internet Engineer

技術士
（情報工学部門）

39 years of ham radio licensee @jj1bdx

25 years of computer science experience

10 years since PhD

2010-2012: Professor, ACCMS/IIMC, Kyoto University

So what?

I'm just an old man

Protip: don't listen to what old people say

Protip 2: speak and think in English

Protip 3: do and try everything by yourself

Protip 4: watching a lecture won't teach you anything

Protip 5: writing code and making things are *fun*

Lecture theme: *sustainability*

Sustainable computers, internet, and social systems

Why sustainability?

Resources are limited

Life is short; we must survive

We need to pass it on, to the next generation(s)

Can we?

WARNING

My talks are only for your food of thought

It's *your* job to think

OK let's get down to business!
